Introducing the *ExpressJobs* App

OKLAHOMA CITY, June 6, 2018 — Bringing job seekers and recruiters closer together than ever, Express Employment Professionals announces the release of its much-anticipated *ExpressJobs* app.

The new app is a significant step in the digital transformation of the company, which believes in creating a personalized experience for job seekers while harnessing the power of technology.

“*ExpressJobs* is free to download in the United States and Canada and offers real-time, location-based services for job seekers and current Express associates,” Express CEO Bill Stoller said. “In creating an app with customized job results based on selected choices, we’re elevating our service to meet the needs of job seekers across North America. In a time of low unemployment, getting our clients the right talent, quickly, is the way we continue to grow the economy. *ExpressJobs* is another tool to help us do just that.”

With more than 12,000 jobs currently posted to *ExpressJobs*, the app leverages machine-learning models and intelligent search to help users easily find jobs in their area, link to their social networks, apply to jobs, schedule interviews, access resources and manage their employment details, all within the same platform. Additional features include live messaging capabilities to allow Express staff and job seekers to be in constant contact. This allows staffers to develop real relationships with job seekers and continue to maintain these touchpoints throughout their careers.

“Additionally, in the digital age, many rely on friends and family members for referrals regarding opportunities they may not otherwise be aware of in their community,” Stoller said. “*ExpressJobs* allows for referral features, granting users the ability to share job openings with peers directly through the app using traditional text and social media.”

For current Express associates, *ExpressJobs* gives them easy access to work assignment history and documents, such as payment history and employment forms, in addition to helping users view their schedule, clock in and out, submit timecards and much more.

“Combining the power of new mobile technology, web and machine learning has led to a solution that will transform the applicant experience from the ground up, unlocking the potential for exponential growth while keeping the focus on what’s most important—the people,” Stoller added.

ExpressJobs is available to download for free for Apple and Android products through the Apple App Store and Google Play.
